

Your buzzbox can do more than just make and receive calls. You can type these codes into your handset to perform different functions:

CHECK VOICEMAIL - Dial *97

Your voicemail mailbox password is 123. Type this when requested and you'll have access to your most recent voicemail messages. You can also press option 0 from the menu to personalise your voicemail message.

BLACKLIST A NUMBER - Dial *30

To prevent a nuisance call from coming in, this is a very useful feature. Dial the full number including the area code to blacklist a number. Dial *31 to un-blacklist.

CALL FORWARD ALL CALLS - Dial *72

To forward all calls to another number, firstly enter your buzzbox telephone number as written on this quickstart guide when requested. Secondly, enter the full phone number you want to divert all calls to (the 'target attendant'), including the area code when requested. Dial *73 to deactivate call forward.

CALL FORWARD ONLY UNANSWERED CALLS - Dial *52

To forward unanswered calls to another number, firstly enter your buzzbox telephone number as written on this quickstart guide when requested. Secondly, enter the full phone number you want to divert all calls to (the 'target attendant'), including the area code when requested. Dial *53 to deactivate call forward.

DO NOT DISTURB - Dial *78

This will send all calls to your number to your voicemail. Dial *79 to turn it off.

CALL WAITING ENABLE - Dial *70

If you don't want callers to ever get the engaged tone or reach voicemail while you're on another call, enable Call Waiting. You can turn it off with *71, then callers will go to voicemail when you are on the line.

LAST NUMBER DIALLED - *69

This will tell you about the last number you called from your phone.

IDENTIFY YOUR LINE - *65

If you forget what your phone number is, dial this code to find out.

HANDSET MANUAL

If you would like a copy of the handset manual, please download it from here:
